Gaskets and Gasket sets suitable for

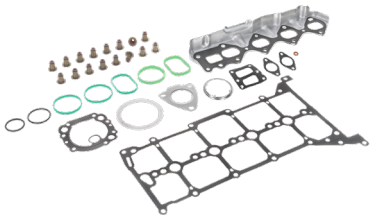

FORD

2.0 l Panther EcoBlue

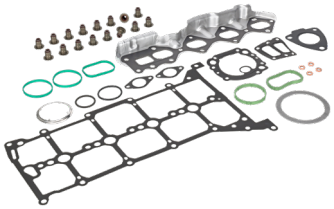

The Ford 2.0 liter Panther EcoBlue diesel engines, including engine codes such as YMFS, YMF6, YMFA, YMFB, BKFA, and BKFB, form a family of inline four-cylinder engines that were primarily used in Ford light commercial vehicles and vans. With a displacement of approximately 2.0 liters, these engines are designed for efficiency, reliability, and solid pulling performance in both everyday operation and under load. Technically, they feature a DOHC valvetrain, a common-rail fuel injection system, and an exhaust-gas turbocharger, in some variants equipped with variable turbine geometry. The robust engine design is particularly well suited for continuous commercial use, for example in transport and service vehicles.
